ABDURRAHAMAN JAMIU

Software Engineer | Frontend & Full-Stack Development | Data Science & AI

Dubai, UAE | +971 50 950 4958 | abdurrahamanjamiu75@outlook.com

LinkedIn | GitHub | Portfolio

PROFESSIONAL SUMMARY

Software engineer specialising in React, TypeScript and modern web applications, with commercial experience delivering e-commerce platforms, ERP interfaces and client-facing products, including secure payment workflows and CMS integrations. Currently pursuing an MSc in Data Science and Artificial Intelligence at Middlesex University Dubai to build machine learning and AI-enabled software on a strong engineering foundation.

TECHNICAL SKILLS

Data science & AI: Python, Pandas, NumPy, Scikit-learn, Matplotlib, machine learning, Google Gemini API
Frontend: JavaScript, TypeScript, React, Next.js, Tailwind CSS, HTML5, CSS3, responsive UI
Backend & integration: Node.js, Express.js, Netlify Functions, REST APIs, Laravel/PHP, serverless workflows
Data & databases: SQL, PostgreSQL (Supabase), MongoDB, MySQL, Firebase
Tools & practices: Git/GitHub, Vite, Netlify, Decap CMS, Socket.io, Web Crypto API, SEO and performance optimisation

EDUCATION

MSc Data Science and Artificial Intelligence | Middlesex University Dubai • *2026 – 2027 (Expected)* • *Dubai, UAE*

B.Eng. Computer Engineering, Second Class Upper Honours | Federal University of Technology, Minna • *2018 – 2025* • *Nigeria*

- A grades in all mathematics courses.

PROFESSIONAL EXPERIENCE

Freelance Frontend Developer | UAE & Nigerian Clients • *May 2026 – Present*

- **Ajoke Gold International:** Built and launched a serverless e-commerce platform for a UAE jewellery brand with a 442-product catalogue and multi-currency pricing in AED, USD and NGN; implemented PayPal IPN verification, payment-amount cross-checking, duplicate-transaction detection and retry-safe order emails.
- **Ejidezee Gold International:** Built a serverless e-commerce platform for a UAE jewellery brand with a 241-product catalogue; integrated Decap CMS and Netlify Identity so the non-technical client manages products and images without touching code.
- **Brickstrade (Sep 2026):** Delivered a four-page real-estate website in two weeks using React, TypeScript and Vite, with an interactive project slideshow and EmailJS contact form.

Frontend Developer (Frontend Lead) | FaLGates Limited • *Aug 2025 – Jun 2026* • *Kaduna, Nigeria*

- Led frontend implementation of ERP modules designed to replace manual processes across multiple departments, working with management and an engineering team of about seven.
- Rebuilt the corporate website in React, improving interface usability and performance.

Web Developer & SEO Optimisation | Luxiar Construction Ltd • *Feb 2025 – Aug 2025* • *Abuja, Nigeria*

- Improved SEO, mobile responsiveness and page performance through keyword research and technical optimisation.

IT Personnel | Hausba • *Feb 2025 – Apr 2025* • *Abuja, Nigeria*

- Updated and maintained more than 1,000 product records, keeping the catalogue accurate and consistent.
- Set up a Zoho-based learning platform for company employees.

Lead Front-end Developer & Company Representative | FundusAI • *Jan 2024 – Aug 2024* • *Abuja, Nigeria*

- Led frontend development for an AI-powered diabetic retinopathy screening product and represented the company at the FUT Tech Hangout.

Engineering Intern | Galaxy Backbone (Federal Government ICT infrastructure company) • *Oct 2023 – Feb 2024* • *Abuja, Nigeria*

- Supported field troubleshooting of Ethernet cabling and internet connectivity at residential and commercial sites.

SELECTED PROJECTS

Waypoint — Opportunity Matching Platform | Co-founder & Project Architect • *Sep 2026 – Present*

- Designing a platform that matches users to scholarships, jobs and fellowships using SQL eligibility filters and pgvector semantic search (in development).

WhisperBox — End-to-End Encrypted Messaging | Personal Project • *Jun 2026 – Present*

- Building an encrypted messaging app with client-side AES-GCM encryption and RSA-OAEP key wrapping via the Web Crypto API.
- Protected private keys with PBKDF2-derived password encryption, storing keys in IndexedDB and only encrypted message data on the server.

AI Page Summarizer — Chrome Extension | Personal Project • *Jun 2026*

- Built a Manifest V3 Chrome extension that uses Google Gemini to summarise webpages into bullet-point insights.
- Implemented content extraction, URL-based caching with 30-minute expiry, reading-time estimates, clipboard copy and light/dark themes, routing AI requests through the background service worker.

E-Walk-In Library — Digital Library & Tracking System | Zamani College, Kaduna • *Nov 2022*

- Built a MERN library system with role-based student and librarian access, class-based book filtering and librarian notifications, managing a catalogue of up to 100 books.
- Implemented a five-stage borrowing workflow, seven-day due-date tracking, overdue fines and scheduled missing-book flagging; trained students and staff to use the system.

CERTIFICATIONS & LANGUAGES

ALX Software Engineering — Front-end Specialization (Feb 2025) | NIIT Diploma in Enterprise Application Development (Java) | Deloitte Data Analytics & Forensic Technology Job Simulation (2025) | IELTS 7.5, British Council (Mar 2025)

Languages: English (Fluent), Yoruba, Hausa, French (Elementary)
